Pharmacovigilance System Master File (PSMF):

1. QPPV responsibilities (PSMF section 1)

1.1 QPPV details

Item	Entry
QPPV name	Not provided
Qualifications and experience	Not provided
Location in the EU or EEA	Not provided
24-hour contact details	Not provided
Deputy and back-up arrangement	Not provided
Date of appointment	Not provided

1.2 Responsibilities

Responsibility	What it means	Evidence in the pack
Overall responsibility for the PV system	Has the authority to make sure the system is set up, works and stays compliant	Owns PV-SOP-001, PV-SOP-002, PV-SOP-004, PV-SOP-005, PV-SOP-007. No appointment or authority statement provided
The PSMF	Keeps the PSMF accurate, up to date and available to authorities	Not provided
Case processing and reporting	Oversees collection, assessment and timely reporting of case reports	Owns PV-SOP-001 Case Intake (v4.2) and PV-SOP-002 Medical Review (v4.3)
Aggregate reporting and risk management	Oversees periodic safety reports and risk management plans	Owns PV-SOP-004 Aggregate Reports (v4.5). No SOP for risk management plans is listed
Signal management	Oversees detection, evaluation and decisions on action	PV-SOP-003 Signal Management (v3.3) is owned by Safety Operations. QPPV involvement is not described
Vendors and partners	Makes sure delegated activities are controlled	Owns PV-SOP-005 Vendor Oversight (v2.2). No vendor list provided
Audit and CAPA	Makes sure audits take place and corrective actions are followed up	Owns PV-SOP-007 Audit and CAPA (v3.5). No audit results provided
Authority contact and inspections	Single contact point, available at all times, and leads inspection readiness	Not provided
Deputy and back-up	A named deputy covers absences	Not provided

Observation. The QPPV owns five of the eight SOPs, including day-to-day processes (case intake, medical review) and Audit and CAPA. The QPPV is expected to oversee the system, not run each process, and audits should be independent of the area audited. It should be confirmed that daily work is delegated and that QPPV oversight (for example review of indicators and audit reports) is documented separately.

2. Organisational structure (PSMF section 2)

The pack has no organisation chart. The functions below are taken from the owner fields in the SOP register and the system inventory.

Function	Evidence	What it owns in the pack
QPPV	SOP register	5 SOPs: PV-SOP-001, PV-SOP-002, PV-SOP-004, PV-SOP-005, PV-SOP-007
Safety Operations	SOP register	PV-SOP-003, PV-SOP-008 (signal management, literature monitoring)
Quality Assurance	SOP register	PV-SOP-006 (business continuity)
Quality	System inventory	PV-SYS-02 document management, PV-SYS-04 signal analytics
IT	System inventory	PV-SYS-01 safety database, PV-SYS-03 training records

Still needed. Organisation chart with reporting lines, locations, the deputy QPPV, a list of delegated activities and agreements (PV-SOP-005 suggests vendors are used, but none are listed) and the link between the QPPV and the Safety Operations and Quality functions. The registers use two names for the quality function (Quality and Quality Assurance). It should be confirmed whether they are the same.

3. Sources of safety data (PSMF section 3)

Source	Evidence in the pack	Status

Source	Evidence in the pack	Status
Individual case reports (spontaneous)	PV-SOP-001 Case Intake	Process evidenced. Reporter groups and volumes not provided
Medical literature	PV-SOP-008 Literature Monitoring	Process evidenced. Databases and frequency not provided
Clinical studies and post-authorisation studies	Not mentioned	Not provided
Patient support and market research programmes	Not mentioned	Not provided
Partners and licensing agreements	PV-SOP-005 Vendor Oversight suggests delegated activities	Not provided
Authority and digital sources	Not mentioned	Not provided

4. Computerised systems and safety database (PSMF section 4)

4.1 System register

ID	Purpose	Owner	Validation status	Backup	Last access review	Days before 31 Oct 2026	Note
PV-SYS-01	Safety database	IT	Validated	Weekly	2026-05-20	164	
PV-SYS-02	Document management	Quality	Remediation open	Weekly	2026-02-28	245	Remediation open
PV-SYS-03	Training records	IT	Remediation open	Weekly	2026-06-27	126	Remediation open
PV-SYS-04	Signal analytics	Quality	Remediation open	Weekly	2026-05-05	179	Remediation open

Only PV-SYS-01 is validated. The pack does not say what the open remediation items are, their due dates or any risk assessment.

4.2 Safety database architecture

Item	Entry
System	PV-SYS-01 Safety database, owned by IT
Validation status	Validated (date and validation report not provided)
Backup	Weekly
Last access review	2026-05-20
Product, vendor and version	Not provided
Hosting and location (the pack does not say whether it is global or regional)	Not provided
User groups and access rights	Not provided
Interfaces (for example electronic reporting to authorities, literature and signal analytics)	Not provided
Audit trail, archiving and retention	Not provided
Disaster recovery and recovery targets	Not provided. See finding F5

4.3 How the systems support PV processes

System	Supports (inferred from the stated purpose)	Related SOPs
PV-SYS-01 Safety database	Case intake, medical review, reporting and the case data used in aggregate reports	PV-SOP-001, 002, 004
PV-SYS-02 Document management	Control of SOPs, assessments, reports and PSMF versions	All SOPs
PV-SYS-03 Training records	Evidence behind the training percentages in the SOP register	All SOPs
PV-SYS-04 Signal analytics	Signal detection and tracking	PV-SOP-003

Observations. Three of the four systems have remediation open, and they are the ones that hold the evidence for document control, training and signals. All four are backed up weekly, so up to a week of data could be lost in a failure. The last access reviews are 126 to 245 days old, with document management the oldest. The review frequency is not stated in the pack.

5. PV processes and signal management (PSMF section 5)

5.1 Signal management workflow

Step	Stage	Activity	Output	SOP and system
1	Detection	Review the safety database, aggregate data, literature and other sources for new safety information	Potential signals	PV-SOP-003, PV-SOP-008; PV-SYS-04, PV-SYS-01
2	Validation	Check there is enough evidence to justify more analysis and whether the information is new	Validated or closed signals, with reasons	PV-SOP-003; PV-SYS-04
3	Analysis and prioritisation	Review seriousness, number and quality of cases and public health impact, then set priority	Prioritised signals	PV-SOP-003; PV-SYS-04
4	Assessment	Medical review of cases and other evidence, including causality	Assessment and conclusion	PV-SOP-002, PV-SOP-003
5	Recommendation for action	Decide: no action, more data, product information change, risk management plan update or a study. QPPV oversight	Approved decision	PV-SOP-003, PV-SOP-004
6	Notification	Inform authorities and partners where required and update periodic reports	Submission records	PV-SOP-004; PV-SYS-02
7	Tracking and documentation	Keep a signal log with dates, decisions and rationale, and check timelines	Signal log and archived evidence	PV-SYS-04, PV-SYS-02

The pack has no step timelines or role assignments. The steps follow EU GVP Module IX and must be checked against PV-SOP-003, which was not provided. Safety Operations owns PV-SOP-003.

5.2 Processes and the SOPs that cover them

Process	SOP	Owner	Version
Case collection and processing	PV-SOP-001 Case Intake	QPPV	4.2
Medical review of cases	PV-SOP-002 Medical Review	QPPV	4.3
Signal management	PV-SOP-003 Signal Management	Safety Operations	3.3
Periodic and aggregate reporting	PV-SOP-004 Aggregate Reports	QPPV	4.5
Oversight of partners and vendors	PV-SOP-005 Vendor Oversight	QPPV	2.2
Business continuity	PV-SOP-006 Business Continuity	Quality Assurance	3.0
Audit and corrective actions	PV-SOP-007 Audit and CAPA	QPPV	3.5
Literature monitoring	PV-SOP-008 Literature Monitoring	Safety Operations	1.1

Not evidenced in the register. Expedited reporting and submissions, risk management planning, safety data exchange agreements, PSMF maintenance, records and archiving, inspection management and change control. They may be covered inside other SOPs. This should be confirmed (finding F8).

6. Performance indicators (PSMF section 6)

Indicator	Pack data	Status
SOP training completion	Mean 94%, range 87 to 98%. Four of eight SOPs below 95%	Provided. No target in the pack
Systems validated	1 of 4 (25%)	Provided
Systems with remediation open	3 of 4	Provided
Backup frequency	Weekly for all four systems	Provided
Access reviews	Last done 126 to 245 days before 31 Oct 2026	Provided. Frequency not stated
SOPs in effect	8 SOPs, in effect for 3.8 to 20.7 months	Provided. Review interval not stated
Case report submission on time (7 and 15 days)		Not provided
Periodic report submission on time		Not provided
Signals detected, validated and closed on time		Not provided
Audit findings and CAPA closed on time		Not provided
Inspection findings		Not provided

No training target is stated in the pack. Training should be complete before staff perform a process, so I flagged anything below 95% as a priority (my working threshold) and any figure under 100% needs an explanation.

7. Quality system (PSMF section 7)

7.1 SOP index

SOP ID	Title	Owner	Version	Effective date	Months in effect	Training complete (%)	Flag
PV-SOP-001	Case Intake	QPPV	4.2	2025-02-25	20.1	95	
PV-SOP-002	Medical Review	QPPV	4.3	2025-04-01	19	87	Below 95%
PV-SOP-003	Signal Management	Safety Operations	3.3	2025-04-21	18.3	93	Below 95%
PV-SOP-004	Aggregate Reports	QPPV	4.5	2025-02-08	20.7	97	
PV-SOP-005	Vendor Oversight	QPPV	2.2	2025-03-25	19.2	98	
PV-SOP-006	Business Continuity	Quality Assurance	3.0	2026-01-04	9.9	92	Below 95%
PV-SOP-007	Audit and CAPA	QPPV	3.5	2025-05-26	17.2	96	
PV-SOP-008	Literature Monitoring	Safety Operations	1.1	2026-07-06	3.8	94	Below 95%

Months in effect are counted to 31 October 2026. The register has no approval or next review dates.

7.2 Training, document control and validation

- Training: 94% mean completion. The lowest are Medical Review (87%), Business Continuity (92%), Signal Management (93%) and Literature Monitoring (94%). PV-SOP-008 took effect on 6 July 2026, so untrained staff on a new procedure should be explained.
- The training records system (PV-SYS-03) and the document management system (PV-SYS-02) both have remediation open, so the evidence for training and for SOP version control is itself under remediation.
- Versions and effective dates are recorded in the SOP register. Approval, review and retirement of SOPs are not shown.

7.3 Audit history

The pack does not give any audit. The table shows what the PSMF needs for each audit, with the entries left as not provided.

Audit date	Type	Scope	Findings	CAPA reference	CAPA status
Not provided	Internal	Not provided	Not provided	Not provided	Not provided
Not provided	Vendor or partner	Not provided	Not provided	Not provided	Not provided
Not provided	Regulatory inspection	Not provided	Not provided	Not provided	Not provided

CAPA. PV-SOP-007 Audit and CAPA (version 3.5, owned by the QPPV) is in effect. Three open system remediation items suggest open corrective actions, but CAPA numbers, owners and due dates are not provided.

8. Annexes (PSMF section 8)

Annex	Content	Status	Where
A	List of products covered	Not provided	
B	QPPV details, CV and deputy	Not provided	
C	Organisation chart and locations	Not provided	
D	Delegated activities and agreements	Not provided	
E	SOP index	Provided	Section 8.1
F	Computerised systems list	Provided	Section 5.1
G	Performance indicators and results	Partly	Section 7
H	Audits and corrective actions	Not provided	Section 8.3
I	PSMF change log	Not provided (this is draft v1.0)
